FEEL SOMETHING NEW

PRICE LIST 2025

ARTEOR™ ADVANCE

Made for your success

VISIONARY – INNOVATIVE – COMMITTED

ARTEOR™ ADVANCE

For premium projects with character

Arteor Advance is about turning a successful classic into something even better. The starting point for this redesign are the features of the Arteor range that specifiers, engineers and contractors alike have appreciated for years: easy and safe installation, the endless possibilities offered by the modularity of the range, and its versatility which makes it suitable for projects of all types, all over the world.

Arteor Advance makes it even easier to deliver premium projects. With its completely new design, connected, smart and sustainable, the range will help you express your very own personal style.

VISIONARY.

Design as expression of a lifestyle

The design of Arteor Advance is a response to current technological developments and social evolutions. At a time of expanding urbanization, where work can be performed anywhere, and with the boundaries between the virtual and real worlds becoming increasingly blurred, there is a growing demand for intuitive technology with a human feel.

Design trend: combining minimalism with opulence

The ubiquitous touchscreen awakens the need for real experience, involving the senses of touch, hearing, and sight. That's why contemporary interior design today is often inspired by 'visual richness', with intense colours, striking patterns, lots of plants and statement furniture. This is then teamed with minimalistic details, limited to basic shapes and understated colours and forms. These can either be integrated with harmony in mind or deliberately used to create a distinct contrast.

COMMITTED.
Design is about more
than looks

Arteor Advance concentrates on the essentials, but its design approach is about more than just looks or styling. The avoidance of unnecessary details is also driven by Legrand's commitment to promote sustainability. The development was guided by the principle of 'reduce, reuse, recycle', which takes in every aspect of the life cycle, from product design via production and use through to recycling.

Various measures are aimed at optimising the carbon footprint of the new range. These improvements in the environmental properties are reviewed on a regular basis using methods that are based on the principles of the life cycle analysis.

Arteor Advance is a good example of how Legrand puts its sustainability objectives into practice. At the same time, it supports you in achieving your own targets, as Arteor Advance helps you comply with even the most demanding environmental standards.

Two forms, one design concept

Classic

Design language

Arteor Advance is available in two design lines, with clearly different rocker formats. The Square design gives a whole new dimension to a classic form. The Slender rocker is a completely new design embodying the trends of the future.

Elite

Floating rocker

The impression created by the floating rocker is the same for both types: Light and elegant, it seems to float above the plate. Both forms can be combined to great effect as well. The Slender version allows to make a clear statement, while the Square version is more subtle and discreet.

Taking Arteor™ to the next level

Arteor Advance's spectacular design language, the pared-down selection of materials, and the elegant, neutral colour palette all favour design solutions that aspire to deliver outstanding looks and functionality.

Arteor Advance has all the advantages of a modular system that is compatible with all the main installation standards. For your premium projects, all around the world.

No compromise on installation safety

The tried and tested support frame from the Arteor range has been adopted for Arteor Advance without any changes. Its robustness is valued around the world, as well as its safety. It is, of course, available for all the main installation standards worldwide.

Screw caps can be closed once the support frame is installed, ensuring total insulation.

The support frame combines the robustness of a metal frame with the insulating qualities of plastic overmoulding.

Available for all the main installation standards worldwide.

Plate adjuster for that perfect look

The new plate adjuster is another detail where Arteor Advance underlines its premium quality and uncompromising ambition: This mobile feature is integrated to the rear of the plate and allows to compensate for unevenness in the wall. For that perfect look.

The flexible plate adjuster compensates for unevenness in the wall.

Our switches are compliant with revised BIS standard (IS 3854:2023) requirements. Also, our switches are covered additionally for use on Self-Ballasted Lamp (SBL) loads.

SBL power rating as per IS3854:2023

Switch Rating	6A, 230V~	10A, 230V~	16A, 230V~	20A, 230V~
SBL power (Watt)	100 W	100 W	200 W	250 W

Warranty policy

- The Company, at its discretion, will replace products if they have any manufacturing defect within 10 years for switches (without LED lamp) and power sockets. For all other **Arteor™ Advance** wiring accessories the guarantee will be 2 years.
- The above guarantee is applicable when the devices are used in Legrand metal flush boxes. Otherwise the guarantee period will be reduced by 50%.
- The guarantee is only applicable when the products are installed as per the Company's instructions and not tampered in any manner.
- The guarantee states the Company's entire liability. It does not extend to cover consequential loss or damage or installation costs arising from defective products.
